***The canals are our Heritage, created as a transport system in an entirely different age of horse-drawn travel over 200 years ago. We ask that you respect the waterways environment and acknowledge other users, including the wildlife population.***

***Travelling too fast causes excessive waves which can destroy nests and will erode the canal banks. Fishermen also have a right to use the waterways and will not thank you for sweeping away their keep-nets! Always slow down whilst passing fishermen or moored boats & KEEP TO THE RIGHT when passing other moving boats. Please cruise courteously and without loud music. Above all, HAVE FUN!!***
